September 2020 Construction Update

Dear Devotees and Triad Community Members,

Construction Update:

During the month of August 2020, many days of unprecedented rains have hindered site development and balalayam construction activities. Despite heavy rains, the construction of sediment pond berm was completed. The installation of sediment pond components, including outlet pipes, ballasts, collars, cut off trench, baffles etc. are ongoing. The nirmana/foundation puja for the balalayam was performed onsite on August 8th 2020. The foundation pad for the balalayam up to grade level, including filling, compaction and testing by ECS was completed. The RPM job trailer was moved to the construction site and temporary electricity is expected shortly. The selection of exterior and interior materials, including EFIS finish/color, flooring, cabinets etc. were completed. The building construction materials, including structural steel and rebar will be delivered onsite next week. After the inspection of the sediment pond, balalayam's foundation footings, concrete slab on grade and structural steel erection are expected to be completed this month.
